

DAYTON, OH (May, 1st 2023) – The Great Keep Getting Better – the New and Improved HTA Series

Introducing the new Dayton Audio HTA Series Integrated Stereo Hybrid Tube Amplifiers designed for music fans who want the best possible listening experience. These amplifiers use a specially designed Class AB solid-state power amp stage that delivers high power output with low distortion, while the preamp stage uses amber-toned preamp tubes to provide a rich and warm sound that will elevate your music experience.

The new line of hybrid tube amplifiers includes three models: the [HTA20](#), [HTA100](#), and the [HTA200](#). The HTA20 is a compact 20-watt stereo amplifier that features Bluetooth 5.0 connectivity for wireless music streaming, a Sub Out to connect external subwoofers for added low-end, built-in USB DAC for direct connection to computers, and a conveniently placed headphone output for private listening. The HTA100 is a more powerful 100-watt stereo amplifier that offers the same features as the HTA100BT, as well as a preamp output for connecting to a separate power amplifier and a subwoofer output for adding deep bass to the sound. The HTA100 delivers 100 watts of rich, warm sound with amber-toned preamp tubes. It offers multiple input options including Bluetooth, coaxial, optical digital, line-in, and phono RCA inputs with a preamp and ground hookup for turntables. New to the lineup is the HTA200 hybrid tube amplifier. The HTA200 is the biggest and baddest hybrid tube amplifier available with all the best features of the HTA100 and adds more power; 100W per channel. It also has a digital display, a wireless IR remote, and a motorized volume control. The new HTA200 delivers peak class A/B performance for those that seek a unique audio experience.

About Dayton Audio

For more than 20 years, Dayton Audio has been a leading supplier for audio and video, combining real-world design with high-tech manufacturing techniques to offer some of the finest consumer electronic products today.
