### **Get Solid Bass from Spaces Never Thought Possible!**

DAYTON, OH – The unique and versatile Dayton Audio LW150-4 6" woofer was designed for ultra-low profile applications.

Its low-profile frame and unique venting permit the back of the woofer to be placed directly against cabinet or even embedded (countersunk) into the cabinet, resulting in an enclosure less than 1-1/2" deep. Great match for today's ultra-thin TVs or use as a down firing subwoofer in a low powered system, low-frequency down-firing driver in a center channel/monitor stand, or bookshelf stand.

#### **About Dayton Audio**
