Hi-Fly™ Multi-room Wi-Fi Audio Technology

DAYTON, OH – Dayton Audio introduces the newest technology on the market! Let your audio listening experience soar with the new Hi-Fly Multi-room audio technology from Dayton Audio.

Your Music. Your Way. Take Control

Turn your stereo or powered speakers into a Wi-Fi controlled audio system with the WFA02 Wi-Fi Audio adapter, or enhance your home's audio with the MARK2-WF powered Wi-Fi enabled speakers. Stream Internet radio stations or play your favorite music from Spotify and Pandora. This adapter turns your present powered speakers or home stereo into an Internet radio and music streaming system.

Super Simple Setup

Set-up is effortless, making it easy to add multiple speakers for instant whole-house audio.

Control the Airwaves at Home

The Hi-Fly app is free and can be downloaded from any Android™ or Apple® device.

With the Hi-Fly App, you can stream online music, listen to songs directly from your device, even listen to music from your home network. You can group or ungroup speakers and select playback from different sources using your tablet or mobile device. The Hi-Fly Multi-room technology makes it possible to play any song in any room or play the same song in all rooms. Plus, your music continues to play even if your phone is turned off or you need to take a call.

Stylish Looks Meet Audio Bliss

The retro looks of the MARK2-WF will make a statement while filling your room with full, rich tones. This powered speaker will add punch to rock music, mellow out with R&B, and put finesse into your favorite classical symphony. Full range sound is accomplished from the plethora of drivers including: Two 1" silk dome tweeters, two 2" midrange woofers, a 3-1/2" subwoofer, and a passive radiator for deep bass extension. Onboard dials and capacitive buttons such as volume, input method, track selection, Bluetooth and NFC pairing, and play/pause/phone answering give you control you need.
