# Dayton Audio's Indoor/Outdoor Speakers - Io655wt

Speakers are everywhere at the moment so to lead the market in the wired variety you have to offer something a little special. Please enter Dayton Audio's premium indoor/outdoor loudspeakers, the IO655WT.

Everything about this speaker shouts quality. From the packaging, the design, the sound and feel.

They look equally as great above

your patio as they would in your living room. These are hardy units that are shockproof, dustproof and water-resistant so I can leave them anywhere.

The obvious question to ask about a speaker is what does it sound like. The answer is bloody brilliant! It is fantastically loud and clear with an amazing range through the highs, mid range and most importantly a deep

bass. These speakers come with a 5 year warranty which again shows the confidence they have in their own ability.

Style and substance, great indoor/outdoor speakers at the very affordable price of \$136 for these beauties.
