

CSPB65 UL Plenum Speaker Kit Instructions

(When used in conjunction with Dayton CS620C speaker and plenum rated speaker cable meets UL 2043 requirements)

Preparing ceiling tile:

- Remove ceiling tile from grid
- Place and center tile bridge on back of ceiling tile
- Trace a circle on ceiling tile
- Cut circle out

Installing speaker:

- Remove grill from ceiling speaker to access the screws
- Place speaker in hole turn mounting screws clockwise and tighten (DO NOT over tighten) speaker should be snug against the tile

Installing ceiling tile:

- For access remove adjacent ceiling tile
- With bridge in place replace ceiling tile
- Make sure that the bridge is resting on the ceiling grid rails

Installing plenum cover:

- Remove appropriate knock-out from cover
- Run speaker wire through the hole
- Connect wires to speaker
- Place cover over speaker and line up with mounting tabs
- Once aligned turn clockwise to lock cover to the bridge
- Tighten sheathed cable connector

Finishing up:

- Replace speaker grill
- Reinstall adjacent ceiling tile
